

Assignment: Develop a simple student registration system in **React** Only.

This system should allow for the management of:

- **Course Types:**
 - Create new course types (e.g., Individual, Group, Special).
 - List existing course types.
 - Update the names of existing course types.
 - Delete existing course types.
- **Courses:**
 - Create new courses (e.g., Hindi, English, Urdu).
 - List existing courses.
 - Update the names of existing courses.
 - Delete existing courses.
- **Course Offerings:**
 - Create new course offerings by associating a course with a course type (e.g., "Individual - English," "Group - Hindi").
 - List all available course offerings.
 - Update the association between a course and course type.
 - Delete existing course offerings.
- **Student Registrations:**
 - Allow students to register for available course offerings.
 - List all registered students for a specific course offering.
 - Implement a filter to show available course offerings based on the selected course type.

Technical Requirements:

- **Frontend:**
 - Design an intuitive and user-friendly user interface (UI).
 - Implement data validation and error handling.
 - Ensure the application is responsive and works well on different devices.
- **Version Control:**
 - Manage your project using Git and host the code on GitHub.
- **Deployment:**
 - Deploy a hosted version of your project.

Submission:

- Submit a link to your GitHub repository containing the source code.
- Submit a link to the deployed version of your project.

Deadline:

- Complete the task within two days of receiving this assignment.
